

**Interaction Report**

Report ID:

Date Produced:

05 October 2024

**Hepatology Treatment****Co-medications**

Sofosbuvir/Velpatasvir

Methotrexate

This report lists the summaries of potential interactions (i.e. "red", "amber" and "yellow" classifications) for the drugs in the table above.

Interactions with a "green" or "grey" classification (i.e. no clinically significant interaction or no clear data) have been checked and are listed at the end of this report, but summaries are not shown. Please note that some co-medications with a green classification may require dose adjustment due to hepatic impairment.

For full details of all interactions, see [www.hepatology-druginteractions.org](http://www.hepatology-druginteractions.org).

**Description of the interactions**

Potential clinically significant interaction - likely to require additional monitoring, alteration of drug dosage or timing of administration (AMBER)

**Sofosbuvir/Velpatasvir + Methotrexate**

Coadministration has not been studied. Methotrexate is a substrate of BCRP and concentrations may increase due to inhibition by sofosbuvir/velpatasvir. Although no a priori dose alteration is required, close monitoring is recommended.
